Whispers from The Brighter World
A Fourth Revelation

*Saturday, December 4, 1999 - 8:00 a.m.*

*The universe is populated with planets of which some are inhabited. It is in those places where your evolution continues. Those places have different forms of life, undetectable by Earthmen in the current state of their knowledge.*

*"Fortunately, their technology has serious limitations; all these forays into space are sufficiently dangerous and harm a certain balance. Their dogged determination to explore and conquer will not stop by itself. Time will come when it will be necessary to put an end to this kind of conquest, as the means being used are devastating.*

*"Man wants to play at being the conqueror of space; he believes he is alone on the planet Earth, which is being closely monitored. Such terrible human tragedies – greater and greater – are taking place on it, without any effective means being envisaged to really remedy them.*

*"What would man go and do on another planet apart from reproducing the same systems, the same social misery he keeps dramatically spreading in his place? He is in utmost excess; we can only note these sad facts."*
