Whispers from The Brighter World

Thursday, December 12, 2013 – 10:00 a.m.

Many of our faithful abhyasis await these messages. They understand their importance and the action the messages generate within them. This action is very subtle and keeps its mystery well. A spiritual approach requires surrender and trust, and most of our brothers and sisters comply with this. The mountain to climb is within, as the sages of the past have said. The objective always remains the same: in the meanders of the spiritual heart lies the key to discovery and to a desired spiritual ascent. Everything is done in silence, in simplicity – here there are no flashy displays, but rather an action that is sustained and effective. We can see the progress made by our aspirants; it is very satisfactory and moreover promises beautiful successes for our entire Mission.

This Mission is being strengthened at all levels. This Hyderabad ashram will become the main beacon of Sahaj Marg, and its connection with all the other ashrams throughout India and the world will be evident and very effective. Some high places are like that; this one is already a true blessing for the entire Mission. The ways of God are revealed at an opportune moment when great designs are planned for the good of humanity. The new era will benefit from a unique action, grand in its effects. May all our abhyasis fully realize what our Sahaj Marg path can offer them. Such is our hope.
