Whispers from The Brighter World
A Fourth Revelation

Sunday, December 5, 1999 - 8:00 a.m.

The Heart's Code is a very good approach to the issue. This book is interesting; it represents a serious scientific study. It does not capture all the most determining aspects but it can give food for thought to the sceptics.

"This seeker has understood that the heart is the seat of the soul; his exploration builds on reactions resulting from heart transplants.

"The physical heart is the reflection of the spiritual heart; it is a kind of replica that does so much important work.

"The spiritual heart is vast; the physical heart bathes in it and is surrounded and assisted by it. The secret code of the soul lies there, as does the genetic code that determines the personality of a being.

"Both are involved. It is a vast project for the scientists, who are nowhere near to decoding everything, but it is a promising beginning. You have started getting evidence of what we have been propounding for a long time; a small step has thus been taken.

"As far as we are concerned, we work on important aspects that make you progress, as is explained in some of our books. A great step will have been taken for man's good when spirituality and science converge and work together."
