Whispers from The Brighter World

Saturday, July 28, 2001 – 8:00 a.m.

Human beings are moving with blindfolds on their eyes. For some of them, the blindfold is raised at times, thus enabling them to enlighten their fellow beings.

Life on Earth has reached a stage where solutions must be found, so that humans can be transformed in every respect. Humanity has fallen prey to negative forces that cannot entirely be counterbalanced by the best aspects.

The plague of the world is persistent; our efforts to transform it bear fruit, but evolution is slow and will have to pass through other factors, in accordance with our action.

You all belong to this plan in more ways than one. Being aspirants to higher spirituality, you are positive elements.

The harvest, which is currently being prepared in the world, creates a hope for the future; this resilient and productive crop will expand in a satisfactory way.

Every chance will be given to humanity to face up to things and develop under the best auspices.

May this new world see the light of day, generated by beings having reached higher levels of consciousness!
