Whispers from The Brighter World

Sunday, July 23, 2000 – 8:00 a.m.

My dear son, the Mission is making its way in the world; nothing will stop it. Don't worry, my son, we see to it and we help you. As far as France is concerned, we have expressed ourselves on the unfortunate reasons that are slowing down its progression.

You may have to cancel some steps of your journey, one of which is Augerans, as that is more particularly under surveillance.

You will have to wait until this 'anti-sects' wave calms down. We know which forces are fomenting it and they are powerful, but nothing is lost. What must be will be, God wants it so.

Pure and determined hearts will see where the truth is. That's all we can add on the topic that's beyond common sense. In the circumstances, do your best; as always, we are close to you. Events of this kind are unavoidable in a mad world where true values are not recognized for what they are.

Abhyasis will have to understand, motivate themselves well, and be more involved than ever.
