Whispers from The Brighter World

Friday, September 15, 2000 – 10:00 a.m.

Are you wondering what we can still have to say? These contacts have become a habit for you and for us too.

It is our way of showing you all that we are not insensitive to your fate. We are worried about human beings, they are capable of the best and the worst.

This world is given over to the madness of human beings. 'Progress' increases violence, and although there are noble souls emerging from this cesspool, we are worried about the future of humanity.

God will have to hit hard to stop this mess and to bring humans back to more wisdom. Pray for a better future where spirituality could help your brothers and sisters plunged into the darkness of devastating materialism.

Help us, not only by your prayers and an assiduous practice, but by an edifying behaviour which encourages those who are seeking to take the same step.

Set an example of tolerance, faith and love; you will serve a great cause.

Babuji
