Whispers from The Brighter World

Tuesday, October 3, 2000 – 10:00 a.m.

This boy is not a medium, but he is impressionable in the sense that we can pass him information that you can confirm. We appreciate their way of doing that work with so much heart and an acute sense of analysis. They are perfect in their role and will be able to speak about these messages with great conviction, having understood them in all their subtlety.

We have explored a certain number of aspects of human behaviour and tried to draw your attention to the flaws you all must correct to further your progress. We suggest a way of thinking and simply being. It should put you more at ease with others and with yourselves. We don't impose anything and don't want to make you feel guilty on any account; that is not in our methods. We just want to help you see yourselves in your own reality and make the decisions you deem useful for your inner transformation. You are the only judges of your behaviours; your fate lies in your hands. We only want to make you aware of what these behaviours should be, so that you can get where you wish.
