Whispers from The Brighter World

Wednesday, October 4, 2000 – 10:00 a.m.

Don't dwell on what is said in this book on channelling. The issue is complex and there are no reasonable scientific explanations of this state; the ones given do not capture the most striking aspects of it.

True mediums are chosen. In ancient times, they were recognized and respected, most particularly in certain parts of the world. Prominent personalities used to consult them and take account of what they said when making important decisions. Some heads of state do the same today, but they are careful not to disclose it, for fear of being laughed at by the ignorant. It's worth stressing that true mediums are rare. Do not seek to know more on this topic; further explanations would not convince obtuse minds. There are better things to do; let those who can, understand.

Excessive materialism drives individuals away from true knowledge and the real capabilities of the human being. At the speed things are going, people will become real robots one day, completely dehumanized.

The innumerable resources of the brain, which we have already mentioned, will not be recognized and used for a long time to come. Many steps remain to be cleared before reaching the Age of Enlightenment. That is the way it is.
