Whispers from The Brighter World

Monday, December 4, 2000 – 10:00 a.m.

Never stop singing divine love, and living it within you. It is the sesame that opens doors. Acting this way compensates for many failings.

Love embellishes all, it can transform the most arid hearts. It surrounds them, englobes them, and finally submerges them. Nothing can resist its vibratory power.

'True lovers' are recognizable: they have a particular sparkle in their eyes, suns reflect in them and illuminate their gaze.

Call love ceaselessly. It can adorn the most ordinary being with magnificence. Such wealth is not given to everyone – it is innate or received by grace. This divine heritage is by far the most important.

Love modifies the vibration of the human body by making each one of its cells vibrate differently.

To love is to have in the heart a treasure, a unique force that transforms and lights up what surrounds it.

Excel in this vision of love and in its application. It will propel you to unsuspected heights, elated by your own success.
