The Medium: Babuji, may my heart vibrate eternally in your light and sing your praises.

Nothing can be acquired forever. Human beings sometimes engage on hazardous ways and get completely lost.

What can really lead them to make such choices? Their ego, their lack of humility and surrender. They say they love us, yet only seek to harm those whom we love.

Why do good servants of the Mission give up following us without valid reasons, why do they cause so much harm?

The mazes of the human soul are unfathomable. My son's situation, in relation to all these betrayals, saddens us. It is unbearable to see him struggling amidst all these difficulties generated by brothers and sisters who should help and support him in his heavy task. Yet we can't resolve everything and ensure that the reign of love and peace between people manifests before the appointed hour.

These behaviours and these bad aspects of the human personality must reach their peak in order to release them from their unfortunate inclinations: that is the rule prevailing in this world.

Human beings go to extremes in their villainy before their good sides can manifest themselves.

This eternal play of good and evil on Earth is distressing. As we've often said: we work so that human beings are freed from the bad aspects of their nature, which must ultimately be removed.

Babuji
