Whispers from The Brighter World

Friday, November 19, 1999 – 8:00 a.m.

There is no need to worry about France. Some abhyasis who lack motivation have left; others are taking a break – it's normal.

They need to assimilate all they have received and take stock. It's necessary to let them go at their own pace and not rush anything. Each being reacts in their own way; it's the result that counts. In their case, it's a need for interiorization that manifests itself. They will set out again stronger and more determined once that hurdle is passed.

We offer all of you a real spiritual feast, the most subtle foods are at your disposal. What is your appetite? That is the question.

If you realize that it is a feast, the awareness is good and should lead you all to making the right choice – to consume according to your appetite and assimilate the whole perfectly. Do you see how simple it is? You are the ones to manage your business, as you feel. We are there to help and understand you, but we cannot push you against your will. Even if we deplore certain behaviours, you all have the freedom to do as you please.
