Whispers from The Brighter World

Monday, February 8, 2016 – 10:00 a.m.

These messages have given a lot to our abhyasis and will continue to do so for a very long time. Some ignore them, others appreciate them. Such is life in its many aspects, and it has always been so for writings that have been a valuable asset for humanity.

The Masters of the past, in their own manner, carry the current Master, who is so very committed; he is at the service of this beautiful and great cause – a spiritual path adapted to present times. In the future it will leave an impressive mark, one that is undreamt of today, you can be sure. Nothing is in vain when it is done for the good. So many actions heavy with consequences take place in this world; how to curb this hatred that is unjustified in light of the laws of Karma, the principle of reincarnation, and life, quite simply, with the respect it inspires. Will the human being understand one day that everything is counted: thoughts, actions – however small they may be – do not remain ignored. Following a spiritual path denotes a true aspiration for the Divine, more or less evident according to how it is felt by each one. With diligent practice carried by an unprecedented transmission, Sahaj Marg allows one to save precious time – of this you can be sure. It is not easy to assess the distance travelled; some abhyasis walk, others run and sometimes even fly to spaces where grace leaves unforgettable traces.

A heart that calls out is always heard, be sure of it; nothing is lost and anything can create the best there is in one's lifetime. Blessed are our abhyasis. They are on their way, and what a way! To all of them, the very best.

Babuji
