Tuesday, January 23, 2001 – 10:00 a.m.

We will answer your question about what this kind of Love really is, which we mention so often. It is a powerful force that, when it's at its peak, modifies the entire vibratory structure. The starting point is at the level of the heart, which is like an engine stimulating all cellular activity. Love is a blessed, powerful and innovative state, which regenerates the whole being, in all its subtle bodies. It plays a particular role, which none of you detect. It unites the creature with its Creator; science has no notion of this fact.

The vibratory world, which is the basis of all phenomena perceptible to human beings, is completely unknown to them. They talk of vibration, of energy; they try to identify the problem, but this world is too subtle and beyond the reach of their current knowledge. Yet it's the key to the enigma. It's like the air you breathe and without which there would be no life.

Love is the greatest force in the world, and you are all objectively unaware of it.

All this talk may seem crazy and unscientific to you. Science has blinkers and it gets entangled in reasoning that limits it.

All in good time; let the era of true knowledge come – it's not for tomorrow.

When this force can truly manifest itself, planet Earth will win its letters of nobility.
