Sunday, February 4, 2001 - 10:00 AM

That was a nice holiday, completed and successful, as per the tradition of our Divine Way. The Great Master showed us the path. It is good to be delighted during this anniversary day of His arrival on Earth. Future generations of abhyasis will have to remember it and venerate Him quite rightly.

"His incarnation was a blessing for humanity. You do not have enough hindsight to appreciate it; it takes so long for great Avatars to take their actual place in history. Each of them lays the foundation stone of an edifice that keeps on expanding in relation to the evolution of beings that populate the planet. They bring to the world the suitable nourishment that is likely to make it grow.

"Our brothers should never forget that this day is very particular. This specific moment of the year represents a very favourable conjunction in the universal order. A kind of renewal occurs that uplifts searching souls and doesn't leave others insensible, although they are ignorant of the why and how of this inner peace.

"Man touched by grace, sometimes starts a path the existence of which he didn't even suspect."
