Enjoy this moment. As you can see, your Master has not forgotten you. One day, he will manage to come towards you. There is nothing wrong anymore between both of you; only your love for him is operating in your relationship. His tour has begun well: he is doing a very good job benefiting not only our brothers and sister abhyasis, but also many souls aspiring to rise.

"His visit is a blessing for all. The old Europe is reaching the end of a cycle; for it, a new era is in the making covering aspects well beyond its economic construction. In future times, it will evolve spiritually, the foundations for this change have been established. This fundamental work is taking place slowly; the world is moving towards a fulfilment.

"Our way is playing a role in this large-scale movement, which will grow with time. For the time being, it can be compared with a cry in a vast desert; that will not be always the case. Our aspirants will become more and more aware of the importance of our system; the greatest number will find it indispensable. It is intrinsically perfect, though seemingly very simple. In spite of what some people would like to do, it does not require any addition. It is necessary to be wary of men's imagination and false needs, which they create themselves and try to associate with a practice which can amply satisfy them if only they stand by it. My son as well as his successors will be able to remain vigilant in this aspect."
