Your Master and you are not as distant from one another as distances separating you on the Earth may show. What do such distances represent for you who defy them every day? Aren't these rendezvous in another dimension of special importance! You can believe it, for so they are.

"No matter whether human beings believe in this kind of phenomena or not, they are not common and they are meant to serve a specific goal which will be justified in due time. It is worth stressing that you are precursors in this kind of contact. Nothing is impossible to God. Only stupid and ignorant people can refute what they do not understand. The true power is that of the spirit, which appears where and when it wants. The power of destructive machines created by man is nothing compared to divine will, when it is manifested, as will be the case on Earth. The new era will be characterized by such manifestations that will restore the prerogatives of this planet and sweep out the evil weighting humanity like it does--without even a majority of individuals realizing it as they are so much entangled in this whirl of vice, violence and profit, creating tragic situations.

"Precedents exist, showing that this divine power had already taken place, destroying continents and wreaking havoc on the configuration of areas emerging from large expanses of water. All can disappear if such is the divine will! God alone decides, in His great goodness. May He save this suffering humanity from a thousand evils and give it a chance to rise and to establish itself in good. It is the wish of all of us and our blessings are geared towards that."
