Dreams must not be dealt with in our way, since in our way, we go so much beyond these manifestations that are illusory to man. They are mere signs, devoid of actual interest. Therefore, what do we have to do with them?

"Our process pertains to another level: our brothers must be prepared for a long march, putting them in line with the new era, clearing their way to true knowledge. This point is worth insisting on: our abhyasis must advance with a spirit of complete openness to what we propose to them. There is a hard job to be done: we are preparing them according to the divine laws that go very far beyond their current comprehension.

"All must look towards the future, a future where spirituality will be the true conqueror of the hearts, by exceeding what could slow them down in this elevation. Let us focus our efforts in view of that, to meet the current requirements; our way, as it is, can do it.

"May all be blessed and responsible, as far as the main thing is concerned."
