My dear daughter,

"Concerning these prophecies, you must write what we dictate without having any qualms.

"You cannot check the soundness of what we are telling you. Some of our comments confirm assertions you read from other sources, which themselves include some of ours; the best inspired ones being written by mediums having access to well-informed sources.

"Great upheavals occurred on this planet time and time again. They made life evolve in its various forms. Terrifying species inhabited the planet that screenwriters of science fiction movies cannot even imagine. The Humanoid kingdom is rather recent; it was not about spontaneous generation, but it was experimentally generated by superior beings, and has evolved with time. Present researchers, whose eyes are riveted on test tubes, would be astounded if they discovered the true reality of mankind. There is no question here of an upper race, as they believe. This sub-race tries to work its way up to the upper level with God's help. There is every hope of success; there is a lot to do, all kinds of committed persons have devoted themselves to it. Eden will not happen in a hurry, but a high level embryonic consciousness is germinating and growing in this world, so as to reach a possible full blossoming in a very distant future."
