Saturday, December 2, 2000 - 10:30 AM

The human will more and more suffer from those kinds of disorders, accentuated by the disequilibrium of the ambient vibratory fields. Minds will have to open up to this reality and work in their own sphere, so that that aspect of the things is no longer ignored.

"Unexplained diseases beset the human being and this phenomenon will worsen in the future. After many researches and erroneous interpretations, a true solution will be found to those problems which are currently badly worked out by science."
