Open your heart to the Infinite Presence, this energy unifying the worlds beyond their characteristics. It is unique and redeeming, and it harmonizes the entire creation. What is man in this immense universe where, whatever his beliefs, the infinitely great and the infinitely small meet! Divine energy animates each piece of life, leaving mankind however with his own reactions; perfection results from the opposite.

"Humans cannot understand divine laws; they go beyond them completely, as they are confined to what they can see and to what they believe. Everything inclines to misleading them, as they are constantly fooled by omnipresent senses; they build theories corresponding to what to them is right.

"Revelation, as far as they are concerned, is not going to happen in a hurry, but it is necessary to prepare them for that, by working with a view to removing the blindfold concealing from them what constitutes the truth, in all its manifestation.

"They are advancing on the path of knowledge; many are searching with fervour and faith, and they deserve to be helped! We are trying to do it by putting at their disposal the elements facilitating a highly spiritualized awakening. The new era fosters, in hearts that are open enough and ready for the ultimate ascent, this aspiration for rising. Our brothers are advancing in this respect, and they are making progress. We notice it particularly during big gatherings, the overall view of which brings satisfaction on this aspect.

"May we pass on enthusiasm and perseverance to all our aspirants, united in an unfailing faith! May they all be blessed."
