Monday, May 17, 1999 - 8:00 a.m.

We want to warn you once again: you are going to face difficult times. We do not mean to throw you into a panic, but you'd better prepare yourself mentally.

"Your 'scientists' are sorcerer's apprentices. Under pretext of going towards progress and the discovery of other worlds, they put the Earth in a dangerous position.

"Could chaos be avoided? By defying the natural laws, one plays with fire.

"What is taking place on the Earth is serious. The monstrous pride of certain men makes them believe they are geniuses. How can their madness be stopped? We may not succeed. There are such stakes in this climb: national glories, money powers.

"This power of the evil is difficult to control. We can only wait and try to preserve what can be preserved.

"Dear children, we cannot give you a miracle solution to preserve you. God is great; keep faith and hope for more serene days where you will no longer have to fear the madness of your fellow creatures. Take refuge in sure values and be as much as possible in union with the Creator."
