The Earth has its own laws, which you cannot understand. They are beyond your understanding; we have already alluded to this issue. Your incarnations on the Earth correspond to a stage of your evolution. To perfect one's work, it is necessary to go through all kinds of situations and multifaceted characters. You thus have the opportunity to work on your weak points. Sometimes you miss the opportunity offered to you to advance; you will have to restart time and again.

"The great sages also had incarnations as brigands before reaching the state of 'perfect'. Such an amount of dregs had to be cleaned off to arrive at this stage!

"A sanguinary dictator also will have the opportunity to come back as a benefactor of humanity to settle his accounts. It is not as simple as that. These are, by and large, the opportunities offered to humans. But how long will it take him to reach this stage?

"The divine laws are always right. There is no final ranking with the 'goodies' on one side and the 'baddies' on the other. Where would lie mercy, forgiveness and the divine love for all His creatures? Any soul can evolve and redeem itself, otherwise we would be in a sad system with all human faults. Who is perfect here below? Each one must be blessed with the opportunity to reach perfection, even though this may require very many lives. Never be in judgement; pray for all your brothers without distinction. All these rules are beyond you; your views are too much limited. Care more about your own life than other people's lives.

"The intentions of God are unfathomable. Do not meddle with them, all will be well. You have enough to do with yourselves."
