The Medium: "Babuji, my heart is full of love and gratitude for all that you are doing for me. I do not express it enough, forgive me."

*Don't you know that we read into the bottom of your hearts and that words, comments are superfluous, especially between us who are in osmosis?*

*"My son is happy; he is building the Mission with ardour; doors are opening and there are interesting prospects for its expansion. He is carried by love. The trust we have put in him has gone beyond our hopes. He is the great organizer: he sees, he plans, he organizes—it's prodigious!*

*"We love men of this calibre. On the human level, he is a born leader. He had to have this dimension to build what currently exists and to prepare the future.*

*"As regards Montpellier, let time do its work; it is not forgotten as you tend to believe. My son knows what he is doing. When the time comes, he will act. He cannot be everywhere at the same time, be trustful. You can be thankful for having such a Master; you are lucky for having met him in this incarnation. He is a great figure. He has all the required qualities to give you the best on all planes. See him as a builder—he excels in that—as well as in all the sublime light of his being."*
