Friday, June 18, 1999 - 8:00 a.m.

You should never trust the comments of one or another concerning my son and his health condition, or the fact that he is sad or happy. Whether he is happy or not, that has no bearing on the effectiveness of his work. He is active twenty-four hours a day; you should not constantly linger over appearances. This or that is said; some of you create Hollywood-type screenplays. His action goes beyond human perceptions.

"He does not always get the expected results nor as quickly as he would like, but he can recognize the efforts of the whole of the abhyasis. Often, he must react and rectify the way some people act for the good of all; otherwise where would the Mission go, if he had to spend his time only singing your praises and blessing you? He wants only the good of all of you and he must act the way he does. That was said in a previous message: he is satisfied with the results obtained in Europe, particularly over the last months.

"The whole is moving; the flowering looks promising. Your Master gives so much of himself, beyond your imagination. It is normal that he goes through moments of tiredness and disillusion; certain beings are so disappointing. Despite everything, he is advancing; he performs a huge work. He acts for the mass of all those who are sincere, active and who follow him with love. See always only the positive sides of the whole of the members and the overall result of his action. In spite of the inevitable weaknesses of some people, he follows you all with love. You should never let yourselves be destabilized by comments concerning the states of soul of my son. They are perhaps only the reflection of those who spread them."
