Whispers from The Brighter World

Tuesday, November 27, 2012 — 10:00 a.m.

Let the flow of our love come into you; hearts that are open and sincere feel it within and it strengthens them. Reading these messages helps those who appreciate them; they capture within themselves that very subtle energy and they own it. 'Doesn't everything have its raison d'être?' Abhyasis of the future will grasp, even more, that which emerges from these writings, as beings will be further refined. Everything will be different and this world will 'work' differently. New energies will transform the functioning of all that constitutes the machinery of life, on all levels. Humans will adapt in the face of the many difficulties that will arise; they will have to. And, they will become stronger in the face of adversity. Getting used to easiness is not ideal for a so-called modern society. The coming major changes will present humans with opportunities for reflection and action. All these changes will not affect the spiritual development of beings who are ready to advance against all odds. Everything is planned and programmed far in advance. Strength and courage are decisive for building this future world; spirituality will become the essential conquest for the development of human beings.

"Let us prepare that future. Everything must change; time will do its work and everything will evolve as expected. Blessed are those who are advancing towards sound values, inestimable in this mad world where everything is, in some manner, drifting away. Time will do its work. May peace and love become the goals of the greatest number [of beings] — there lies the major objective."
