Whispers from The Brighter World

Tuesday, February 12, 2013 — 10:00 a.m.

The most important feature in this symbol is the point of light in its centre; it is appealing in many respects. By including it in their practice, our abhyasis will experience it, over time. It's up to each one to discover the effects it can generate in regular practice. After so many years, it has begun to attract attention; the hidden meaning of the various elements will be revealed to those who give minimal attention to what it represents.

"An esoteric symbol always has a hidden meaning — there, precisely, lies its characteristic. Going beyond appearances, truly interiorising oneself will bring suitable answers to such a course of action. It is not about attractive elements; it is about their deep meaning. Sufficient interiorisation will provide seekers with the desired answers.

"Our abhyasis will feel more and more drawn to this symbol. It was given a long time ago and only now does it raise some interest. This is how it goes, one might say. It all takes place slowly in a world where laws are inescapable; we cannot change anything now in this area.

"In the future, a new orientation of the planets will give rise to a movement of global acceleration. Then, in many areas, everything in the general organisation of life will be reconsidered on all levels. The preparation of such changes takes place very slowly on Earth; its pace is slow, being included in an overall movement. Doesn't everything have its raison d'être? That is not our area of responsibility; we can only adapt, and especially here — precisely in this area of spirituality — we have to transcend the laws of materiality. Our focus is elsewhere; it is essential for all of us.

"Blessings to all, and particularly to those who are nourished by these messages. May these messages open up wide horizons to them according to their personal aspirations."
