My dear son,

"We follow your footsteps and we bless your actions. We accept your travels as planned. Do what you can do; we only ask you to reduce your activities. Your travels on this Indian land are energy-wise less exhausting for you than in other parts in the world, where vibratory conditions are different. The development of the Mission in this country delights us. Move forward on this land, my son; foundations are strong thereon. It doesn't have to undergo the incomprehension that reigns in certain countries and slows down its expansion.

"This Himalayan Ashram will have a big radiance. The site is impregnable; it will be appreciated by high level spiritual beings who will come to seek peace therein. The place is well chosen; it is beneficial. We appreciate that realization.

"My Revered Master is happy to see the development of this way that is dear to him. Spare yourself, so that under your impetus, construction will go on as regards the edifice that the Shri Ram Chandra Mission represents for the world. We are with you and we support you as much as possible."
