My Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, July 27, 2013 — 10:00 a.m.

Birth anniversaries are very important moments in our Mission. Each one has specific characteristics and they complement each other in the work we are doing. The living Master has this privilege: he operates differently, at the level of matter. Each of our actions fits into a whole, being a major asset for the Mission's extension and for the concentration of energies we use throughout this beautiful spiritual community. In this area, the Mission brings that which suits this era of transition, when people who have reached sufficient maturity can begin a truly appropriate work. The call is great and it is understood by the noble souls who are searching for a true path that culminates in mergence with the Ultimate. The journey is not easy; it requires some effort, appropriate discipline and sufficient openness of heart. A refined humanity is taking form on the horizon; it will not be easy to alleviate mankind's multifarious sufferings and the pervading negativity.

"Many souls are searching; they thirst for the Divine, though not all of them are actually aware of it. One thing at a time — to the higher powers nothing is impossible. One day, humanity will elevate its status and turn to a promising future. Is that not the goal of our action here below!"
