Whispers from The Brighter World

Tuesday, September 3, 2013 — 10:00 a.m.

The deeper meaning of life is not revealed to humans. However thorough their research may be, it cannot take them back up to the most subtle level of divine manifestation. Humans must be content with what they can understand, whatever their investigative capabilities may be in this area. Approaching the essentials of spirituality is already an important step that allows humans to develop, in the truest sense of evolution. Many stages are to be crossed before one catches the slightest glimpse of this higher power. Heart openness, surrender and generosity in this quest lead to the desired state. Nothing is futile in this regard. The human heart is the central axis of one's elevation. The subtlety of its vibratory nature is beyond today's scientific knowledge. This configuration of the heart is remarkably subtle. The real capabilities of the human being will assert themselves here below one day, after a big step has been made at the level of understanding. That time will come. We are all working towards it, and each of our aspirants, by complying with our teachings, contributes to this general transformation. All of us here aim for this, as do many of our abhyasis who are faithful and truly committed. May all fervently involve themselves; such is the greatest wish for this present humanity which is in distress on many levels. May the best be accomplished — that is the goal to be reached, under our blessings."
