My Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Sunday, March 16, 2014 — 10:00 a.m.

We will revert to all aspects related to our Mission; they must be known to our abhyasis. In themselves, our abhyasis constitute a whole that is promising for the future of the Mission and its expansion. The next and fourth spiritual Master, as already mentioned previously, will fit into this promising plan. Everything must be clear to our abhyasis: living Masters are all servants of the divine powers and work for a great and beautiful cause that will leave its mark on humanity. Perseverance is required so that what must be achieved can be achieved.

"Times are changing. As we have said in a previous message, the highly blessed site of Hyderabad will become the 'reference place' of Sahaj Marg, a centre point of all our energies in the service of the Divine. This place will be the consecration of our beautiful way, whose principle is special in that it truly offers to committed abhyasis a real approach to the Divine. It takes time here below for things to take shape; each Master has brought to the Mission what was appropriate at the time. All of us here are working towards future times when our way will be involved in a system whose effects will be very promising.

"Everything is slow on Earth and is strengthened over time by many challenges, but positive results ensue when such is the wish of a hierarchy that is highly involved. This growth is very dear to us. Spiritual Masters, whether they are incarnate or not, participate in this important project with determination. This world deserves to move forward. Many souls actually aspire to it, and therefore we cannot but participate in a very real manner. With all possible love, under our blessings."
