Whispers from The Brighter World

Sunday, June 1, 2014 — 10:00 a.m.

The history of the world conceals many mysteries. Humans often distort that history at their convenience, denying a truth that would be more endearing. May our Mission never experience the same in the future. The main thing will live on; key aspects are maintained even if some facts are slightly distorted. Humanity is like that, but there is no transgressing divine law; that which must be will be, whatever the views of naysayers. A spiritual way is not given in vain; it is in line with present times and it will provide exactly what will be needed in the future.

"Very long cycles lead to new teachings that are more suited to the present reality. Humans change in their beliefs and even more so in their perceptions of life in all its subtlety. Humanity as it was many centuries back would surprise a lot of people today; they have no idea of the limitations it displayed in those times. Today, spirituality can be accessed by anyone; one just has to truly want it. Nothing is imposed by any ideology or system of caste. It only requires faith. When the calling is felt in the heart, anyone can act on it. Total commitment leads to results that are not very palpable, but nonetheless real. There lies the true success of a system; the one we advocate is highly effective and will leave a very long-lasting mark on the times. Such is our constant wish, as shared by the entire hierarchy of Masters. This is how it goes."
