Whispers from The Brighter World

Tuesday, August 12, 2014 — 10:00 a.m.

How could we not be at the rendezvous; this moment is awaited, believe me. All the testimonies you are receiving from all over the world speak for themselves; that book testifies to it and we are appreciative. Blessed are all those who are following us through this mystical epic — the Sahaj Marg path, given to the world by divine grace. Time will lend it all the importance it deserves, you can be sure. The many beings who trust us, and who are progressing very satisfactorily, are all that matters in this area. This egregore is growing in power, which facilitates the cohesion between all beings who are thus guided by the living Master.

"In this Mission everything is being put into place gradually. In this area, as in every other, time provides confirmation which is greatly appreciated here. Everything is very slow on this Earth; the pace is thus determined regarding human evolution. The incessant repetition of actions is necessary, and humans need to be convinced of this so that they can do their best. What is being done on the spiritual plane at this time is reflected at other levels of consciousness where this work is not neglected; beings at those levels can benefit from it in their own manner. All these phenomena may be surprising to people, so many of whom still think that nothing exists beyond this life here below. This world is one of the links in a great chain that is the whole of creation, the result of the divine power whose action is incessant. This is how it goes. May all be blessed and enlightened accordingly."
