Whispers from The Brighter World

Saturday, April 4, 2015 — 10:00 a.m.

These messages are the result of a connection between the heart of the Masters and the hearts of our abhyasis. Most abhyasis appreciate them, and we are happy for that. By reading them, they benefit from our energies — especially when there is a sincere call on their part. These writings do not exist in vain — as we have said often enough — regardless of what some recalcitrant people may believe. The future will confirm these comments. Even in a Mission like ours, egotistical reactions can manifest. We are not [dealing with] a perfect world. It would be too ideal if this way of the heart were able to resolve everything, even though it is truly effective.

"Everything is taken into account — there lies the inexorable logic that governs humankind. We are moving on this path with great confidence in the great and rewarding things it generates for sincere hearts that seek our action. Such beings are carried, all of them progressing at their own pace, as nothing can be forced. However, we can see that many beautiful souls are opening up to the transcendence of the spirit and are thus saving valuable time.

"Blessed are those who are advancing with confidence in our work and making progress in proportion to this appeal. Nothing is in vain, and everything is counted — much more so than human beings on this Earth can imagine. May all truly realise where the most important thing lies and devote the necessary time and commitment to reaching the goal. All are helped and supported under our blessings."
