Whispers from The Brighter World

Tuesday, April 7, 2015 — 10:00 a.m.

There is always something to say. You have to spare yourself, however these contacts are real treasures for your heart, which aspires only for that. This fervour is felt by many of our abhyasis who read our comments; doesn't everything have its raison d'être! For many men and women who are committed to this process, present-day life in this world is destabilising; it is far from the true values that life has to offer for their personal and spiritual elevation. Each person has his or her own path; what must be comes about sooner or later, and then the best can be accomplished. An incarnation is exposed to multiple situations. It is necessary at all costs to face them and do one's best. Thus life unfolds before the seeker according to the laws of karma — such laws retain their mystery; all have to put up with them, and it is best to accept them since they are inescapable.

"Following a spiritual way promotes the progress of a being. Each person advances at his or her own pace. But through their commitment, all confirm their inner potential. Life is as one, and it continues elsewhere in order to explore other fields of action that bear out the personality of the seeker. Sahaj Marg is a simple way; it nevertheless provides multiple benefits. Each person seizes in his or her own manner that which is offered to them, and in this way the best is accomplished in accordance with our most ardent wishes. Blessings to all."
