Whispers from The Brighter World

Saturday, July 25, 2015 — 10:00 a.m.

The Sahaj Marg Mission is a force, a vibrational power, especially on such special days when our brothers and sisters come together, united in the same spirit of gratitude and love for the Masters. They themselves receive accordingly, and they vibrate as a result of our joint and salutary action. This world is full of mysteries, and the human being is far from knowing everything, particularly regarding the potential impact of a spiritual path. In our way, the action is geared towards the good and that which is positive for the beings involved in this process. A spiritual path like Sahaj Marg produces results well beyond this world. Complementarity is thus created between the various spaces that are accessible to spirituality as we understand it. In our way, we do not impose anything; we propose things with a view to what is good and the progress of each person according to their deepest aspirations for the Divine.

"All are called, and all feel the need to advance in true knowledge — that which frees the human being from the heaviness that is inherent in material life and that operates in this era of so-called progress. Such progress inhibits the profound aspiration of the being to rise. One day, the divine goal will be achieved. Regardless of the various elements that constitute limitations, a salutary force is bound to prevail and act for the good of all. Our abhyasis as a whole are making progress — such is our reason for being and for working more than ever. For each of our abhyasis we wish a success that is comprehensive and enlightening in all respects, under our special blessings."
