Whispers from The Brighter World

Sunday, July 26, 2015 — 10:00 a.m.

The way of Sahaj Marg is following its path and is becoming stronger over the years; what has long been planned for its expansion in the world will take place at the appropriate time. It provides much more than it seems. Its effects will become obvious through their action over time, when so many changes will occur on the material and vibratory planes, developing a real sensitivity in humans. This sensitivity will allow them to better capture an action that is perceptible and highly effective.

"Spirituality is fundamentally necessary for human evolution. Many aspects of it will become perceptible to humans who today are still far from an approach that is necessary for their evolution. Blessed are the pure in heart, it has been said — they will see the light. Progressing in this direction opens up perspectives on the Infinite and saves valuable time by clearing the necessary steps. When the subtle centres are acted upon, the personality of the human being changes, adapting more easily to that which becomes possible. When a salutary action is thus exerted, the best can happen. Is that not the goal of our ceaseless action! We are repeating ourselves, but we have to, as our words only lightly touch the minds of our abhyasis. It is necessary to revert to them so that key aspects permeate the consciousness of all.

"To each of our abhyasis we wish a real success, the conquest of a sacred space where the best can be accomplished.

"Special blessings."
