Whispers from The Brighter World

Wednesday, July 29, 2015 — 10:00 a.m.

Everything lives, everything moves — on Earth and beyond — in this universe that is so complex that human beings cannot comprehend it. Do they even truly know themselves? It does not seem so, contrary to what they believe. Humanity's destiny will bring about many transformations; it has always been so since the dawn of time. An immutable world devoid of discoveries and surprises would not induce the human being to seek to advance in knowledge. The movement of life keeps its mysteries well; its complexity intrigues humans and allows them to advance to the best of their ability. The most important aspect — namely, spirituality — is far too often ignored. True spirituality, that which uplifts the human being towards constructive knowledge, will one day prevail in the world. Within each being is that source, whose effects are divine when it is called appropriately — namely, without certain attributes imposed for erroneous reasons. Human beings carry within themselves the Divine, this unparalleled source where they can quench their thirst as needed, while complying of course with divine laws.

"Sahaj Marg is advancing in this direction. It is not sectarian; it aims to develop in each person the capabilities that are well hidden in all human beings. The Divine dwells in the being; it is there that the wonder lies. A person holds within each cell that parcel of divine energy that is capable of producing the best when it is recognised as such. Following a way that is capable of developing one's ability to unite with the Divine is an indescribable gift. May this way of Sahaj Marg continue to progress here below in order to help the seeker find the ineffable peace within, under the guidance of an elected Master, as is still necessary in the current era. To all our brothers and sisters, we wish the best that can be, and total success."
