Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, September 19, 2015 — 10:00 a.m.

A spiritual way like ours is intended for the greatest number of people. Its approach remains easy, and its teaching focuses on the essentials as far as results are concerned, without any further complication. Reaching the goal does not lie in an intellectual approach. In this system, it is about something else — to develop in each person the subtlety and finesse necessary for grasping a transmission that is capable of converting a person to the highest level of his or her being. Our comments are addressed to the greatest number, many of whom draw from such comments the desired benefits. All are involved and receive according to their personal calling and their own ability to receive.

"That abhyasi can rest assured; she is making her way, and we are guiding her accordingly so that the best possible personal success can be achieved. No one is forgotten. Our goal is to help the greatest number reach the ultimate goal, the one that is the most rewarding.

"Blessings to all."
