Whispers from The Brighter World

Sunday, September 20, 2015 — 10:00 a.m.

Be at peace. Rest assured, these messages help many of our brothers and sisters. Everyone sees in them what they really want to see. The vast majority value these messages, which can be understood by all, according to our wish. Our objective herein is not to deliver a more esoteric teaching. Touching hearts is our absolute priority, and this is in line with the process as we propose it. Each and every person derives from it the desired benefits, according to their own aspirations and their inner potential. You can be sure that all are supported in this respect and benefit from our constant blessings — this is a special feature of our way in which the heart plays a central and decisive role in human evolution. Spiritually speaking, the heart — this special organ — is the centre of our action and is endowed with spiritual powers that are still unknown to the vast majority of human beings. We wish for all our brothers and sisters a spiritual fulfilment such as they hope for, and even beyond their expectations. We are seeing to it, rest assured."
