Whispers from The Brighter World

Wednesday, August 5, 2015 — 10:00 a.m.

Can you imagine the positive impact these messages have had in people's hearts — it is invaluable. Over time, they have nourished people, carrying them in a certain way on this long road of life that spares no one. Ordeals are there and unavoidable. Only the spiritual heart can protect itself and grow stronger through this transmission that is so very special. It cannot be assessed in human terms; its subtlety operates on the sensitive points of the being, imperceptibly but effectively. Real work takes place in this path. The heart, being the central axis of it, has multiple capabilities, some of which are not yet recognised. A day will come when they will be recognised, bringing other perspectives of life into the lives of all.

"Evolution on this Earth is slow; it moves forward at its own pace, and we cannot change anything about it. Focusing on a key point related to spirituality, notably its many as-yet-unrecognised resources, helps one grasp the complexity of that organ [the heart], possessor of many powers. Science is advancing in its discovery. The day it reaches the truth will be a decisive day in human evolution. Divine energy is at the centre of each cell of that organ. There lies reality. Our way focuses its action on that hidden treasure that cannot yet be evaluated at the human level. Let us stay centred on that which concerns us here — the work being done in Sahaj Marg; it is unique, you can be sure.

"Special blessings to all."
