The Medium: "O Babuji, I miss you..."

Consider that I have entrusted a mission to you which consists in working with The Venerable."

Babuji

"I understand you are a sensitive soul, but you must forge ahead and we must proceed like that. In meditation, you must feel your inner space widen. Think that there are worlds inside you and that you are as one with them. Let yourself merge into this upswing. Feel the power of this vibration take possession of your person. These are stages you must go through so that all the atoms of your body are in harmony.

"Do not resist any more, calm your mind and be surrendered in the hands of God. Follow your guide, trust him completely; we are making progress step by step. My dear sister, we have set out on a long voyage, do not look back."

The Venerable
