Whispers from The Brighter World

Wednesday, December 2, 2015 — 10:00 a.m.

See all these beautiful testimonies that are being sent to you regarding the messages. These messages help so many of our brothers and sisters who are attentive to that which emanates from our hearts. These writings touch their hearts much more than they can imagine. Why would they have been given, and for so long, if they did not operate beyond human perception, in accordance with our wishes and for good reason?

"We want to help the greatest number of people overcome the barrier of limitations in today's world — a world that is subjected excessively to all sorts of disturbances. Electromagnetic pollution is worrying. Who currently cares about it? The ease of work provided by these devices is such that a majority of people use them, which creates disturbances that are not taken into consideration. Time will highlight this important aspect of the current situation. We had to draw the attention of our aspirants to this issue, although our action lies elsewhere on planes of consciousness beyond the material. Nevertheless, all is connected. The balance of energy in humans is crucial for their attainment of higher levels of consciousness.

"Harmony will have to prevail one day on Earth. Today's reality is, unfortunately, far from this pacifying aspect. In the future, major changes will come, cleaning up the entire situation in this world. Why not imagine a better world in which all human beings may blossom at all levels. Positive action is never in vain; there is always something that comes of it.

"Endless blessings to all."
