Whispers from The Brighter World

Friday, December 25, 2015 — 10:00 a.m.

Every country has its own customs; anything that can create bonds between people is positive for each of them. Uniting hearts in the same spirit is very favourable. Our dear abhyasis benefit from this egregore that is so special, the effects of which they themselves find difficult to assess. A very subtle world is in the offing. It will still be necessary to go through many trials before achieving a satisfactory level of consciousness, a level towards which we are working. The sincere commitment of our brothers and sisters contributes to the general elevation of their surroundings. Dissensions are very regrettable. They significantly hinder a spiritual movement desired by the higher powers for the good of many sincere hearts that are following this very special way.

"A new era will be established on Earth. It is being prepared slowly, but it will bring about a radical change in many aspects. The world of the future would surprise many beings who are presently living on this planet. Such is evolution; it sometimes rises very quickly to another vibratory context that is decisive for human evolution. Since ancient times, many now vanished civilizations had attained a level that would greatly surprise the people of today who believe that they themselves have reached the highest possible level. The current era is what it is; one must comply with it and above all advance towards a level of consciousness that is accessible and decisive for the rest of the journey.

"All are carried and blessed."
