Whispers from The Brighter World

Wednesday, December 30, 2015 — 10:00 a.m.

This visit is very beneficial for all — we are happy. This dear and great son Kamlesh meets all our expectations. However, he should spare himself. He is very valuable for the whole Mission and for those of us who carry him, in our own manner, with great love. The current means of communication foster exchanges that are necessary to properly maintain unity among all our brothers and sisters around the world. Thus, no one feels isolated, because we are seeing to a global transmission that is productive for all. The Sahaj Marg Mission is a whole, a force whose importance our abhyasis are not truly aware of. May they all be committed with confidence and determination on this extraordinary way — a way in which the heart, this essential human organ, also holds many powers, including an identity that is transitory but also goes well beyond.

"Meditating on the heart as recommended by Sahaj Marg is a sure way to progress. The action of the spiritual Master is very potent and allows a very large number of human beings to go beyond the current stage. Our action, as such, is desired by the higher powers that watch over the progress of humanity that is weighed down by incessant trials and all kinds of sufferings. Spiritual growth opens a fairer path that generates many benefits; may they [the abhyasis] fully realise this and be further committed under our blessings."
