Whispers from The Brighter World

Thursday, March 3, 2016 — 10:00 a.m.

The Earthly journey is constantly marked by trials. Following a spiritual path helps one to make better sense of things and truly engage in a process capable of alleviating karma. Karma is not gentle to humans, but no living species here below is spared. All of these notions escape human reasoning. How can one accept the need for so many trials and sufferings! This is how it is, one might say once again. It is said that from life to life wisdom is acquired. How can one answer all the questions that arise? To a certain extent, it is better to let go of them. Acceptance produces the best; only innate wisdom allows one to achieve it.

"We are working with the aim of identifying the best aspects in each of our brothers and sisters. Spirituality is unfortunately much neglected in this world; it is far from being able to bring all the good it could provide. Independent of rituals, actual work is being performed in refining the subtle bodies along with all that constitutes an individual's 'reality'. From life to life, from experience to experience, each person's true personality is created. Engaging in a spiritual way like Sahaj Marg testifies to a real aspiration to rise, as well as a satisfactory level of achievement in this particular domain. An incarnation that includes a process like that of Sahaj Marg denotes a satisfactory potential.

"Blessings to all."
