Whispers from The Brighter World

Wednesday, March 16, 2016 — 10:00 a.m.

The doors of bliss are opening up within you at these precise moments when your heart is completely offered up to us. This ritual is inscribed in time, and our action has never failed, nor has your surrendering to this feat — that of noting down such a large number of messages. The path of Sahaj Marg is worthwhile, you can be sure. The passing years give to things and events their rightful place. The action of this Mission is very positive. We witness its results and this allows us to prepare an even greater future for it, one that will bear the best fruit. Speaking about the future of a humanity that is in many ways distressed, an enlightened being once said that only spirituality will save the world. Why the wars and incessant violence that endlessly distort this humanity? Will human beings ever succeed in realising their true nature, which arises from a divine energy disseminated on Earth for good reason! How much more strife and suffering will be necessary to reach a sufficient level of consciousness where the best could be accomplished. Only continuous action is desirable; it will allow real progress. You can be certain that such a time will come. The future will reveal a new world generated by an unprecedented change in the level of evolution.

"We are preparing it. It is up to all our brothers and sisters to be committed for the best."
