Whispers from The Brighter World

Thursday, March 31, 2016 — 10:00 a.m.

Here, time does not matter. We are in a privileged space where love can express itself in its own manner; these messages are the fruit of it. Many of our brothers and sisters are nourished by them and capture the special energy that characterises them. Repetition is necessary. It is the very principle of life's increasing expansion in this world for a planned and far-reaching evolution. So many aspects are to be considered; an unprecedented transformation will take place for the good of all humanity. In its current distress, it doesn't clearly distinguish between that which is and that which should be. A spiritual path like ours is preparing in its own manner the world of the future — a world that will be better structured and will have integrated principles that comply with the divine manifestation in all its aspects. Science is advancing, and the human being contributes to this process, benefitting from it in many circumstances but not seeking to go deeper into the divine laws. These laws are the critical and creative power operating on many key aspects for a human evolution that has long been planned. A perfect humanity is not for tomorrow, but it is preparing itself in its own manner. By progressing, the human being is actively contributing to a global evolution that is necessary for the survival of humankind.

May all become aware of the need to move forward and develop spiritually for a satisfactory integration within this redeeming and divine framework. It is up to each and every one to work for the best, under our blessings.
