Whispers from The Brighter World

Tuesday, April 5, 2016 — 10:00 a.m.

Life creates a ceaseless flow of subtle energy. Its vibration is active at all levels. All existing kingdoms on this planet originate from this very special energy — all of creation is based on its action. The divine life can't be grasped in all its reality, but the resulting manifestation is unique, imposing itself in its entirety on the human being. Nothing great and substantial can happen without this constructive and unparalleled energy. Human beings believe they know, but what do they really know! This world of illusion has unique effects that deserve to be dealt with in real depth. This will take place when the time has come for a true knowledge, one that does not mislead in any way. This world of illusion also has its advantages, and these will be revealed in due time. Human beings have at their disposal a creation that is without equal. This planet is so rich in its many manifestations, little known to humans in general. One day, in the distant future, this world will become the high place of knowledge. Everything evolves and changes — generally for the good — in the programmed evolution of the worlds. There are many of these worlds, and some of them are very active, aligning with divine purposes.

May all our brothers and sisters work towards the good, always uniting more and more and being carried by the ceaseless action of the united Masters.
