Whispers from The Brighter World

Tuesday, May 3, 2016 — 10:00 a.m.

A beautiful space of peace and love emerges from such seminars; each time we are delighted to witness the effects of these gatherings on the hearts of our abhyasis. Life goes on with its difficulties and its many hazards, which are nevertheless interspersed with moments of joy and serenity. Such moments are maintained in people's hearts; there are many hearts in our way that fully benefit from an extraordinary transmission. It is not easily assessed, and yet the lives of numerous human beings are transformed thanks to it. This is a real blessing for the Sahaj Marg Mission, which is endowed with many assets.

The new era will bring about unprecedented change, without lessening the effects of a flourishing spiritual path whose benefits will continue to increase and contribute to the elevation of humankind. Everything in this world moves forward slowly and requires long preparation. The reign of the Spirit will prevail one day here below. This is not a utopian notion but rather the reality of a future — one whose elements for bringing about the best possible will become clearer. The Mission must be structured accordingly, making the work of the living Master easier by creating a steadfast chain in the world — one that is supported by strong points that are highly responsible, starting from that which already exists in order to make things simpler and more consolidated on the material plane. Everything is being established slowly in order to face an unprecedented progress in the future. May all our brothers and sisters take an interest and become even more involved.

Blessings to all.
