Whispers from The Brighter World

Friday, May 27, 2016 — 10:00 a.m.

Our action in people's hearts is constant; it achieves that which is acquired in a person's lifetime while going well beyond, thus saving valuable time. All this cannot be assessed in human terms, yet results are there and they remain a very valuable asset. The living Master has powers whose scope he himself cannot evaluate. His action is expanding and he is gaining capabilities never before obtained. He can see far ahead and the soundness of his vision is significant; we leave it to him to act on an inspiration that we oftentimes suggest to him. Under his guidance, the Mission should achieve the maximum of its current possibilities for establishing itself in the world. He possesses the relevant abilities; time and the destiny of this Mission will do the rest. We give him space for reflection before taking decisions that are necessary and expected by some of our abhyasis; he will be inspired in due time. Everything in this world is built slowly, but this is surely the case with regard to what is essential. This world has a profound longing for spirituality, although it is not currently aware of it. Unprecedented events will occur in the future, leading human beings to an awareness that will be decisive for their evolution. Everything has its raison d'être. Changes are needed here below and are called for to achieve the general good. Life goes on, and so does our Mission. In a century from now it will reach its peak in a very different context; it is being prepared today.

To all, a united and decisive action for this Mission, supported by our action.
